SMART LIBRARY REQUEST WORKFLOW IN SERVICE NOW

Ideation Phase:

1. Brainstorming-idea generation
2. Define problem statement template
3. Empathy map canvas

Ideation Phase:

1.Brainstorming-idea generation

Project Overview:

Field	Details
Date	
Team ID	
Project Name	**Smart Library Request Workflow in ServiceNow**
Maximum Marks	**4 marks**

Step 1: Problem Definition

A. Team Gathering & Preparation:

•**Time Allocated:** 10 minutes
•**Participants:** IT Service Management (ITSM) Developers, Library Staff, and Student Representatives (4 people recommended).
•**Facilitation:** Review ServiceNow workflow capabilities and current manual bottlenecks.

B. Define Your Problem Statement:

•**Time Allocated:** 5 minutes
•**Problem Statement:** "How might we [automate the end-to-end library resource request process in ServiceNow to reduce manual approval delays and improve real-time tracking for users]?“

C. Rules of Engagement:

•**Go for volume:** Generate as many automation features as possible.
•**Defer judgment:** No idea is too technical or too simple at this stage.
•**Stay on topic:** Focus strictly on the ServiceNow workflow and user experience.

Step 2: Brainstorming & Grouping:

A.Idea Generation:

•**Time Allocated:** 10 minutes

•**Potential Ideas:**

1. AI-driven auto-approval for low-cost digital resources.
2. Mobile push notifications for book availability.
3. Integration with university ID cards for instant check-out.
4. Automated "due date" reminders via ServiceNow Virtual Agent.
5. Dynamic routing of requests based on the user’s department.
6. Dashboards for library staff to see peak request times.

B.Grouping Ideas:

•**Time Allocated:** 20 minutes

•

•**Clusters:**

- •**Automation:** Auto-approvals, dynamic routing.
- •**Communication:** Push notifications, Virtual Agent reminders.
- •**Data/Analytics:** Staff dashboards, resource tracking.

Step 3: Idea Prioritization:

Time Allocated: 20 minutes

➔The following ideas are prioritized based on **Importance** (impact on the library) and **Feasibility** (ease of implementation in ServiceNow):

Idea	Importance	Feasibility	Priority Level
Dynamic Request Routing	High	High	**Immediate Action**
Virtual Agent Reminders	High	Medium	**High Priority**
AI Auto-Approvals	Medium	Low	**Future Consideration**
Staff Peak-Time Dashboard	Medium	High	**Quick Win**

Ideation Phase:

2.Define the Problem Statements:

Project Details:

Field	Information
Date	
Team ID	
Project Name	Smart Library Request Workflow in ServiceNow
Maximum Marks	2 Marks

Customer Problem Statements:

➔The following table outlines the challenges faced by library users and staff to help find an ideal solution.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A university student with a heavy course load	Request and reserve specific research journals via ServiceNow	I have no visibility into the status of my request or the estimated pickup time	The current process is manual and lacks real-time tracking updates	Anxious and unable to plan my study schedule effectively
PS-2	A library administrator managing high volumes	Approve and fulfill resource requests efficiently	I am overwhelmed by repetitive manual entry and email follow-ups	The workflow is not automated to handle basic requests without human intervention	

Ideation Phase:

3.Empathize & Discover

Maximum Marks	4 Marks

Empathy Map Canvas: University Researcher

Category	User Observations & Insights
What does he THINK AND FEEL?	* "I hope this book is available for my thesis deadline." * Wants a faster way to request materials without visiting the desk. * Worried about missing notifications in a cluttered email inbox. * Colleagues saying, "The library system is so slow and outdated."
What does he HEAR?	* Professors mentioning, "You can find all resources in the new portal." * Influencers talking about seamless digital transformation in education.
What does he SEE?	* The ServiceNow portal interface on his laptop. * Friends using mobile apps for instant service requests. * A long queue at the physical library help desk.
What does he SAY AND DO?	* Asks library staff for status updates via phone. * Checks the ServiceNow portal multiple times a day for updates. * Complains to peers about the lack of real-time tracking.

Pains & Gains:

Pain (Fears, Frustrations, Obstacles)	Gain (Wants, Needs, Success Measures)
* **Uncertainty:** Not knowing if a request is approved.	* **Efficiency:** Automated notifications when a book is ready.
* **Manual Effort:** Having to fill out paper forms or complex emails.	* **Accessibility:** Being able to request items from a mobile device.
* **Delays:** Waiting days for a simple resource confirmation.	* **Accuracy:** Real-time visibility into resource availability.
