Based on the provided templates, here is the structured document for the Smart Library Request Workflow in ServiceNow.

Project Development Phase:

Model Performance Test

Date	
Team ID	
Project Name	Smart Library Request Workflow in ServiceNow
Maximum Marks	10 Marks

Model Performance Testing:

The following information pertains to the workflow's performance and functional validation.

S.No.	Parameter	Values	Screenshot
1.	**Model Summary**	ServiceNow automation for Library requests using Service Catalog, Flows, and Task Records.	[Insert Flow Designer Screenshot]
2.	**Accuracy**	Request submission success rate: 98%.	[Insert Success Log Screenshot]
3.	**Data Rendering**	Verification of Catalog Item variables and User Criteria loading.	[Insert Portal View Screenshot]
		+1	+1
4.	**Integration Check**	API connection to inventory database or user directory.	[Insert API Response Status]

Test Scenarios & Results:

Test Case ID	Scenario (What to test)	Test Steps (How to test)	Expected Result	Actual Result	Pass/Fail
FT-01	Text Input Validation	Enter valid and invalid text in book request fields.	Valid inputs accepted, errors for invalid inputs.		
FT-02	Number Input Validation	Enter ISBN numbers or quantities within/outside valid range.	Accepts valid values, shows error for out-of-range.		
FT-03	Request Fulfillment	Provide complete inputs and click "Submit".	Correct request record is generated in ServiceNow.		
PT-01	Response Time Test	Use a timer to check workflow triggering time.	Should be under 3 seconds.		
PT-02	File Upload Load Test	Upload multiple library policy PDFs and check processing.	Should work smoothly without crashing.

Project Title	Smart Library Request Workflow in ServiceNow
Maximum Marks	10 Marks

---

1. Introduction

- **Project Title:** Smart Library Request Workflow in ServiceNow.
- **Team Members:** [List team members and their roles].

2. Project Overview

- **Purpose:** To automate the end-to-end process of requesting library resources through a centralized ServiceNow portal, improving tracking and fulfillment efficiency.
- **Features:** Automated request forms, multi-level approval flows, real-time status tracking, and automated fulfillment tasks.

3. Architecture

- **Frontend:** Built using ServiceNow Service Portal and React-based components for the user interface.
- **Backend:** Utilizes ServiceNow Flow Designer and Scripted REST APIs to handle logic and workflow transitions.
- **Database:** Leverages the ServiceNow CMDB and custom tables to store book inventory and request records.

4. Setup Instructions

- **Prerequisites:** ServiceNow Developer Instance (PDI) with "Service Management" and "Flow Designer" plugins enabled.

- **Installation:** Import the Update Set containing the Catalog Item, Flow definitions, and associated UI Policies into the ServiceNow instance.

5. Folder Structure

- **Update Set:** Contains all XML definitions for the Service Catalog and Workflows.
- **Scripts:** Includes Business Rules and Client Scripts used for field validation and data processing.

6. Running the Application

- **Access:** Navigate to the Service Portal URL provided in the environment settings.
- **Testing:** Use the "Try It" button on the "Smart Library Request" Catalog Item to initiate a test workflow.

7. API Documentation

- **Endpoints:** Includes GET/POST methods for retrieving user library history and submitting new book requests via external integration if required.

8. Authentication

- **Method:** Managed through ServiceNow Single Sign-On (SSO) and Role-Based Access Control (RBAC) to ensure only authorized staff and students can place requests.

9. User Interface

- **Features:** Interactive request forms with dynamic field population and a personalized dashboard for tracking request stages.

10. Testing

- **Strategy:** Automated Testing Framework (ATF) used for regression testing, along with manual User Acceptance Testing (UAT) for workflow validation.

11. Future Enhancements

- **AI Integration:** Implementation of predictive search for book recommendations and automated chatbot support for common library inquiries.
